

DISPOSABLE E-GEL BREATHER

Product Data

ITEM CODE & NAME:

- **09-YDDB1KG** Disposable Breather 1kg
- **09-YDDB1KG/V** Premium 2-Way Valve

SPECIFICATIONS:

- Desiccant Capacity: 1.0kg
- Standard 3/4 BSP threads - eliminating the need for expensive special threaded adaptors, assists in keeping the number of fittings required to a minimum, reducing costs and reducing the risk of air leaks
- Depending on the size of the oil reservoir, the Disposable Breathers can be simply fitted together and used in series. Again, this will greatly reduce the need for expensive fittings, thereby reducing costs and at the same time ensuring that all Breathers are functioning and performing at the same rate

- A 2-Way Valve Assembly can be purchased separately to the Disposable Breathers, and these Valves will provide full functionality for the e-Gel Silica Gel in Breathers to remove the moisture out of the system efficiently and cost effectively. These two-way Valves are a high quality item, thus ensuring controlled breathing in and out of the breather, and preventing free flow
- High quality with price in mind, delivering value and ensuring cost effective savings

USER TIPS:

- 2-way pressure valve means no free-flow of air
- No adapter needed - includes BSP thread
- Cost-effective
